

Perforation, Customized For You

North  **Clad**[®]
rainscreen solutions

Contact us today to discuss perforation options!

Perforation can add a new dimension to any system. We have the capability of perforating many different materials for use across our entire line of rainscreen products.

Bring us your pattern or image, and we'll use your design to project that pattern onto a single panel or across an entire elevation. Our CNC machinery ensures precise accuracy and great flexibility despite the complexity of your design.
